The **PLUMB** *Ideal*

In presenting you with this new edition of the Plomb Tool Catalog, we are certain you will find it useful because in addition to its value as a catalog, it is really a reference book on high quality hand tools.

The Plomb Tool Company has only one mission, namely, to make the finest of fine tools.

Plomb Tools have been designed in a practical way by consultation with mechanics and craftsmen to produce tools that have practical application. They incorporate lightness with safety . . . balance with strength . . . variety with proper design.

As a result Plomb Tools enable mechanics to do more and better work; they last longer and they classify their owner as a man who uses the best. Plomb Tools lend dignity to the mechanic's profession . . . add distinction and prestige.

Plomb Tools have the happy habit of making friends because of the lifetime service they render which makes them less expensive in the long run.

Mechanics who pride themselves on doing a good job and doing it well will find the Plomb Line their best helpmate.

It's Plomb Speed Tools for the day of speed—streamlined!

TOOLMOBILES and SETS

COMPLETE TOOLMOBILE

"The Modern Mobile Work Bench"

Here's the finest tool box your money can buy. It's convenient and impressive—tops for efficient operation. One piece construction with all parts joined by spot welding. Chest 29½" high without casters or piston rack. 28" wide, 17¾" from front to back. Lustrous chinese red enamel finish. Weight complete without tools 119 pounds, boxed for shipment. Strong as a steel safe. A Plumb Toolmobile saves hours of time and effort. The most popular roller box on the market.

SPECIFICATIONS

- (1) Bolted on rack, has 16 holes and 8 slots for pistons, valves, and tools.
 - (2) Large working surface 17¾" x 28".
 - (3) Barrel lock with locking bar secures everything with one key. Locking bar drops in slot at left out of way when chest is not in use.
 - (4) Side rail on each side for socket rack.
 - (5) Drawer 3" deep, complete with adjustable dividers.
 - (6) Drawer—5" deep with perforated bottom for easy cleaning and to hold movable partitions.
 - (7) Drawer—5" deep. Solid bottom with removable sliding tray.
 - (8) Large compartment 9½" high. Front panel slides under drawer above.
 - (9) Ventilators on both sides.
 - (10) Rounded streamlined corners.
 - (11) 4" rubber tired, ball bearing castors. Front castors with foot operated brakes.
 - (12) 6" x 6" steel reinforcement plate under top for attaching light bolt on vise.
 - (13) All corners reinforced on inside for added strength and rigidity.
 - (14) All drawers run on ball bearing rollers.
- 9969—7 Piston Rack for Toolmobile. Weight, 6 lbs.

Opposite Page

9969—8 Divider strips (sold in any length up to 22" long, order lengths using overall dimensions).

9969—9 Divider holders.

▽ PLUMB ▽ *Streamlined Tools*

7

No. 9969-2 Toolmobile can be secured with just the piston rack and top drawer as illustrated at the right.

This arrangement makes it possible to secure a movable work bench at a cost considerably less than the complete unit. Any or all the drawers needed to complete the Toolmobile may be purchased individually and added to this unit at any time.

Extra drawers are priced upon application only.

The piston rack serves as a fine place to hold tools when not being used for pistons and valves.

No. 9969-3 is the Plumb Toolmobile same as above except minus the piston rack.

This arrangement furnishes one top drawer with barrel lock. Additional drawers, racks, etc., can be purchased if one desires to turn it into a complete Plumb Toolmobile.

No. 9969-4 Toolmobile, less piston rack, not illustrated.

Below — Patented perforated bottom used in the two top drawers of the complete Plumb Toolmobile. Dividers are adjustable and held in place with clips which fasten into perforations, making it possible to partition drawers into compartments for tools of any desired size. Dividers are not original equipment except on the complete Toolmobile 9969-1.

PLOMB Streamlined Tools

PLOMB
PRESENTS
THE

"Wheel About"

9998 TOOL CHEST

The chest is 27" wide, 20½" high, 12" deep. Top lifts up with clips in lid and generous size compartment for larger tools and coveralls. Front lid drops down out of sight, exposing 4 various sized drawers, each with compartments for small tools and operating on "finger touch" roller glides. Shipping wt. 83 lbs.

The "Wheel-About," No. 9998-1, is the combination of Plomb's Master Tool Chest, No. 9998, and small roller cabinet (Wheel-About Jr.) No. 9998-2. By quick assembly of the two as illustrated above you have the smartest tool cabinet on the market.

It is the streamlined tool cabinet that you have longed for. Saves steps. No running back and forth. Rolls to the job. It is really a "safe" for your tools. One outstanding advantage of the "Wheel-About" is that you can remove the tool chest from the lower cabinet when the occasion might require the taking of your tools and box out on a job.

Streamlined in the latest mode. Designed for the utmost utility and convenience. Note its rounded edges, its smooth contours.

The "Wheel-About" complete is 44" high overall, 27" wide at the widest place, 16" deep at the deepest point. The top chest has 4 drawers operating on roller slides. Lid lifts up and has clips for holding speeders. The door of the lower compartment lifts up and slides out of the way. One key locks both units. Equipped with 4 easy rolling casters. Shipping wt. 129 lbs.

THE PLOMB LINE IS THE POPULAR LINE AMONG EXPERIENCED MECHANICS

Ideal Chest and Roller Cabinet Combination

You need look no further for the answer to your dreams for an ultra modern tool chest. As illustrated at the right, the Plomb Wheel-About is built on the same principle as an add-a-shelf bookcase. This makes it possible to begin your ownership of a Wheel-About by purchasing a Wheel-About Junior first and adding the big Master Tool Chest later. Each unit is complete in itself and can be used apart from the other.

Completely equipped with tools this combination is unbeatable. For suggested complete tool sets see illustrations and specifications on the following pages.

ASSEMBLING THE WHEEL ABOUT

Wheel-About Junior

A handy little roller cabinet as you ever wished for. If you already have a fairly large tool box, you can make a mobile tool cabinet with the addition of "Wheel-About, Jr.," by simply bolting your present chest to this roller unit.

The large compartment is equipped with lock and key. Just the place for storage of larger tools, electric drills, etc. Big enough to hold a tote tray.

SPECIFICATIONS

27" long, 16" deep, 25" high, equipped with 4 easy rolling casters. Finished in brilliant Chinese Red. Front is a lid which lifts up and slides out of sight under the top.
 SHIPPING WT. 46 LBS.

THE PLOMB LINE IS THE SPEED LINE FOR SAVING TIME

SPECIAL SOCKETS FOR SOCKET HEAD CAP SCREWS AND SET SCREWS

A real time and labor saver on all machinery and repair work. Use with any Plomb $\frac{1}{4}$ " and $\frac{3}{8}$ " square drive attachment such as the Sliding Bar, Hinge or Speed Handle. Fits all sizes from $\frac{1}{4}$ " to $\frac{5}{8}$ " inc. Note the construction in the illustration. The Hex Drive Plug is removable and new ones can be easily installed. The socket part is fully guaranteed. The Hex Drive Plug is non-replaceable. Extra plugs available. See Specifications below.

4787-K	L-shaped Hex Wrench for removing set screws in sockets.				

5287-A Set consists of the six sizes listed above in wooden box and No. 4787-K for removing the set screws in the sockets.

MIDGET SPECIAL TOOLS

As you turn page after page in this catalog, you find many Midget Tools not shown in the Midget Socket & Attachment section.

The illustration here gives an idea of the little tools you will find, but by no means all of them. For instance there are all types of small Punches and Chisels listed in the Punch & Chisel section.

Small Gear and Bearing Pullers for all light pulling are shown in the Puller Division.

Midget Screwdrivers, all types and kinds, can likewise be found in the Screwdriver section.

Each one is a Plomb product, which means they are the finest tools you can buy.

No. 5402

Plomb Torker No. 5402

Modern motor construction, lighter blocks, and closer tolerances require the Plomb Torker. Accuracy when tightening heads, manifolds, spark plugs, main bearings and clutches prevents distortion and assures a better job. The Plomb Torker saves time in readjustments. It features Two-Way Drive $\frac{1}{2}$ " connections, Two-Way Dial and Floating Handle.

5449

REVERSIBLE RATCHET.

The strongest, lightest and thinnest ratchet made. Reversible at a flip of the lever. Length $10\frac{1}{4}$ ". Wt. $1\frac{1}{2}$ lbs.

RATCHET PARTS.

- 5449B Body
- 5449C Cover
- 5449DL Dog, Left
- 5449DR Dog, Right
- 5449H Cover Screw
- 5449R Rev. Assembly
- 5449S Spring
- 5449W Wheel with Plug

THE HINGE HANDLE.

Three for you to choose from. All upset knurled handles drilled with pinhole. Slender shanks, lightness and balance.

- 5466 $9\frac{1}{2}$ " LONG, WEIGHT $\frac{3}{4}$ lb.
- 5467 15" LONG, WEIGHT $1\frac{1}{4}$ lb.
- 5468 16" LONG, WEIGHT $1\frac{3}{4}$ lb., with $\frac{1}{2}$ " Sq. drive in end of handle.

5466PH

PIN HANDLE.

A handy little bar to be used with any Plomb extension or hinge handle. $11\frac{1}{2}$ " long, $\frac{1}{2}$ " stock.

5485

THE SLIDING BAR.

Friction Ball Hold Plug in any position. Used as a "T" or off set handle. 14" long, weight $1\frac{1}{4}$ lb.

5466

THE ELL HANDLE.

Where real leverage is required the ell handle is tops. 14" long, weight $1\frac{1}{4}$ lb.

5254

P L O M B A D A P T O R S

Increase the range of your Cub and Standard Sets with Plomb Adaptors. Makes it possible to use Cub Sockets with Standard Drive Attachments and vice versa. The same is true with your Heavy Duty Sets too. See Pages 49-53.

5253 1/2 Sq. Male x 3/4 Sq. Female
5254 3/8 Sq. Male x 1/2 Sq. Female

5453 1/2 Sq. Male x 3/4 Sq. Female
5653 3/4 Sq. Male x 1/2 Sq. Female

5253

DRAG LINK SCREW DRIVERS.

Many uses especially on any large slotted screws and used with most 1/2" drive attachments. Non-replaceable.

5444 Bit 3/4" Wide, Length 1 1/16".
5446 Bit 1" Wide, Length 1 1/16".

P L O M B E X T E N S I O N S.

Increase to a wider range the use of your sockets and attachments. Each Plomb extension drilled with hole for pin handle except No. 5460.

5460 2 1/2 INCH EXTENSION.
5461 5 INCH EXTENSION.
5463 10 INCH EXTENSION.
5464 18 INCH EXTENSION.

S P E E D H I N G E H A N D L E.

Combines the features of a speeder and hinge handle. Ball bearing grip. 7" Dia. Swing.

1/16" Stock 16" Long, Wt. 1 1/4 lb.

5470 U N I V E R S A L J O I N T.

Nothing makes your work easier than a Universal Joint when working at some difficult angle.

S P E E D H A N D L E S.

Nothing finer than these Ball Bearing Speeders for really speeding nuts on or off.

5480 18" Long 1/2" Stock, Ball Bearing, Knurled Grip 4" Throw.

5482 18" Long, 3/4" Stock, Ball Bearing, Knurled Grip 3" Throw.

THE PLOMB LINE IS THE SURE LINE FOR COMPLETE SATISFACTION

Specifications--Heavy Duty **$\frac{3}{4}$ " Square Drive Sets**

Socket and Attachment Set **No. 5500-A**

The Handles and Sockets of this big heavy duty set are geared for severe service. A set you can depend on to finish the job. This is a very complete set, and leaves little to be asked for when heavy work is at hand. Note specifications below: Wt. 56 lbs.

Tool No.	Description
5528	$\frac{7}{8}$ " 12 point Socket
5530	$1\frac{1}{16}$ " "
5532	1" "
5534	$1\frac{1}{16}$ " "
5536	$1\frac{1}{8}$ " "
5538	$1\frac{3}{16}$ " "
5540	$1\frac{1}{4}$ " "
5542	$1\frac{5}{16}$ " "
5544	$1\frac{3}{4}$ " "
5546	$1\frac{7}{16}$ " "
5548	$1\frac{1}{2}$ " "

OPEN END & BOX WRENCHES

▽ PLOMB ▽ *Streamlined Tools*

Patent Pending

Industrial

WRENCHES

1000 SERIES

Plomb design will clear at approximately 15° less than standard practice minimum centers.

EXTRA HEAVY DUTY DOUBLE END BOX WRENCHES

Superior design, masterful forging, have made these Plomb Box Wrenches the preference of Industry.

These wrenches are made stronger in the neck, or offset, but done without increasing thickness between the broached opening and the under side of the offset. The crescent

shaped neck section is not only stronger but will work in closer places. High pressure flanges and castings with ribs or bosses adjacent to bolt holes are examples of work where minimum rear wall thickness is invaluable. Safety Engineers wholeheartedly endorse these wrenches. Finish Ind. blue

Patent Pending

2600 SERIES

Industrial

WRENCHES

Extra Heavy Duty Combination Box and Spud End Wrench

You will note a new innovation in this wrench, as Plomb has introduced a real safety factor. It is a combination box wrench with tapered spud handle.

The danger of spreading or slipping, common to the open end wrench under heavy work, is eliminated while this wrench provides the added factor of safety under powerful pulls.

It will help you make quick work of loosening frozen or corroded bolts or nuts. The spud

end is very handy for aligning holes in flanges.

Note in particular the clearance provided by the offset head which overcomes the usual clearance problems. The finish is Industrial Blue. They make an ideal wrench for construction work, oil refineries, etc.

These wrenches are forged from alloy steel and specifications appear on next page.

Plomb Industrial Slugging Wrenches are designed for all types of heavy industrial work where the working space is extremely limited or highly congested. The 12 point opening fits snugly upon the bolt or nut and will remain in position while being struck with heavy hammer or sledge.

This wrench has been a boon to shipbuilders, installing or repairing machinery in ships, diesel power plants, railroad repair shops, oil refineries or any place where heavy machinery is located. Non-replaceable.

Industrial

STRIKING WRENCH

Pat. Pend.

Striking Wrenches are equipped with square striking shank for use in restricted quarters with a hammer. They are offset to allow maximum clearance. Oxidized Blue finish. Made from Alloy Steel.

Open-End Set No. 3200-A

Here is a gem of a midget set of open-end wrenches in our 3200 Series, being 15" openings on one end and 60" on the other. 4 popular wrenches in all, as follows:

Tool No.	15" Opening	60" Opening
3210	13 ¹ / ₄ "	15 ¹ / ₄ "
3215	7 ¹ / ₃₂ "	7 ¹ / ₈ "
3220	9 ¹ / ₃₂ "	5 ¹ / ₁₆ "
3225	11 ¹ / ₃₂ "	3 ¹ / ₈ "
2411	Leatherette Kit	

Open-End Set No. 3200-D

This is the complete set even to including a pair of Plomb Midget Pliers. The Wrenches give you every opening size that we make in this type of wrench. Listed below are the contents.

Tool No.	15" Opening	60" Opening
3210	13 ¹ / ₄ "	15 ¹ / ₄ "
3211	15 ¹ / ₆₄ "	13 ¹ / ₆₄ "
3215	7 ¹ / ₃₂ "	1 ¹ / ₄ "
3216	1 ¹ / ₄ "	7 ¹ / ₃₂ "
3220	9 ¹ / ₃₂ "	5 ¹ / ₁₆ "
3221	5 ¹ / ₁₆ "	9 ¹ / ₃₂ "
3225	11 ¹ / ₃₂ "	3 ¹ / ₈ "
3226	3 ¹ / ₈ "	11 ¹ / ₃₂ "
235	Midget Plomb Plier	
2410	Leatherette Kit	

Open-End Set No. 3300-A

This set is our electrical type with one opening 15", the other 75", a well balanced set for all small work. The set consists of:

Tool No.	15" Opening	75" Opening
3314	7 ¹ / ₃₂ "	7 ¹ / ₃₂ "
3315	15 ¹ / ₆₄ "	15 ¹ / ₆₄ "
3316	1 ¹ / ₄ "	1 ¹ / ₄ "
3318	9 ¹ / ₃₂ "	9 ¹ / ₃₂ "
3320	5 ¹ / ₁₆ "	5 ¹ / ₁₆ "
3322	11 ¹ / ₃₂ "	11 ¹ / ₃₂ "
3324	3 ¹ / ₈ "	3 ¹ / ₈ "
3328	7 ¹ / ₁₆ "	7 ¹ / ₁₆ "
3332	1 ¹ / ₂ "	1 ¹ / ₂ "
2410	Leatherette Kit

THE PLOMB LINE IS THE SPEED LINE FOR SAVING TIME

POPULAR SETS OF 15° BOX WRENCHES

1100-E

You will find this handy set of 6 Plomb Box Wrenches the most useful set in your tool chest. Assorted openings cover a wide range of bolt and nut sizes. Contents follow: No. 1122, 3/8"x 7/16"; No. 1125, 7/16"x1/2"; No. 1126, 1/2"x9/16"; No. 1130, 9/16"x5/8"; No. 1135, 11/16"x3/4"; No. 1140, 13/16"x 7/8"; No. 2405, L'ette Kit. Wt., 1 3/4 lbs.

This large master set leaves little to ask for in an all-around assortment of Plomb's famous line of Double End Box Wrenches. 10 Wrenches that will give you opening sizes to fit most any nut or bolt that comes along. Specifications follow: No. 1120, 5/16"x3/8"; No. 1122, 3/8"x7/16"; No. 1125, 7/16"x1/2"; No. 1126, 1/2"x9/16"; No. 1130, 9/16"x5/8"; No. 1131, 5/8"x3/4"; No. 1135, 11/16"x3/4"; No. 1140, 13/16"x7/8"; No. 1145, 15/16"x1"; No. 1150, 1-1/16"x 1-1/8"; No. 2413, Kit. Wt., 4 lbs.

1100-F

1100-H

You can't afford to be without this very popular set of Plomb Double End Box Wrenches. 7 wrenches without a duplication in the 14 assorted opening sizes. Contents are: No. 1120, 5/16"x3/8"; No. 1125, 7/16"x1/2"; No. 1130, 9/16"x5/8"; No. 1135, 11/16"x3/4"; No. 1140, 13/16"x 7/8"; No. 1145, 15/16"x1"; No. 1150, 1-1/16"x1-1/8"; No. 2406, Leatherette Kit. Wt., 3 1/2 lbs.

PLOMB *Streamlined Tools*

Combination Box and Open-End Wrenches

Both openings same size, Box End offset 15°;
Open End 15° Angle.

The Combination Open End and Box Wrench was first introduced to the American trade by the Plomb Tool Company—a wrench that has proved to be the most popular innovation in wrench manufacturing in a long time. You will note that both openings are the same size. The Box Wrench has always been famous for its safety features,—the Open End for its speed. Here you have in the one wrench the combination of both. Use the Box end for breaking loose or cinching,—the Open end for rinning the nut on or off.

MIDGET ELECTRICAL WRENCHES

15°—80° Both Openings Same Size

You will note the angle openings are 15-80°. Just what you want when working on magnetos, timers, generators, radios, etc., for delicate adjustments. Finish nickel and chrome buffed heads.

Paired openings, different size each end but with alternate angles on next wrench so all eight openings are provided in both 15° and 60° angles. Finished in nickel and chrome with buffed heads.

15° OPEN END WRENCHES

“The Pride Line”

COMPARISON SHOWS PLOMB ADVANTAGES

Shown at the right is an ordinary open-end wrench (A) and an open-end wrench built the Plomb way (B). Compare the two. The special engineering and finest alloy steel used in the Plomb wrench result in one that's stronger, and easier and faster to work with. (1) Less overhang in opening. (2) More accurate fit. (3) Smaller, more compact head. (4) Slender shank with rounded edges as compared to thick sharp edged shank.

3055	1 $\frac{1}{4}$ " x 1 $\frac{1}{16}$ "	15 $\frac{1}{2}$ "
3060	1 $\frac{3}{8}$ " x 1 $\frac{1}{4}$ "	15 $\frac{1}{2}$ "
2413	L'ette Kit. Wt., 8 lbs.	

THE PLOMB LINE IS THE MAJOR LINE OF FINE FORGED TOOLS

Obstruction Box Wrenches

For turning nuts where obstructions prevent easy access with straight wrenches. 1" clearance at middle. 12-point openings.

No.	12-point Openings	Overall Length	Wt.
1725	$\frac{7}{16}$ " x $\frac{1}{2}$ "	5 $\frac{3}{4}$ "	3 oz.
1730	$\frac{9}{16}$ " x $\frac{5}{8}$ "	6 $\frac{1}{4}$ "	4 oz.

Open End Obstruction Wrench "HOG JAW"

45° and 90° Angle, both openings same size. This wrench really takes hold in those places where nuts and bolts are difficult of access.

Number	Opening	U.S.S. Nut Sizes	Number	Opening	U.S.S. Nut Sizes
3128S	7/8"	1/2"	3146S	1 7/16"	7/8"
3134S	1 1/16"	5/8"	3152S	1 5/8"	1"
3140S	1 1/4"	3/4"			

Plomb Tappet Wrenches

Note arrangement of openings—just right for easy working, yet six wrenches are equal to much larger sets of other makes.

No.	Openings	Overall Length	Head Thickness	S. A. E.
3425	$\frac{7}{16}$ " - $\frac{1}{2}$ "	9"	2 $\frac{1}{16}$ "	1 $\frac{1}{4}$ " x $\frac{1}{16}$ "
3426	$\frac{1}{2}$ " - $\frac{9}{16}$ "	9"	2 $\frac{1}{16}$ "	$\frac{9}{16}$ " x $\frac{1}{16}$ "
3430	$\frac{9}{16}$ " - $\frac{5}{8}$ "	9"	2 $\frac{1}{16}$ "	$\frac{3}{8}$ " x $\frac{7}{16}$ "
3431	$\frac{17}{32}$ " - $\frac{3}{4}$ "	9"	2 $\frac{1}{16}$ "	— x $\frac{7}{16}$ "
3435	$\frac{11}{16}$ " - $\frac{3}{4}$ "	9"	2 $\frac{1}{16}$ "	— x $\frac{1}{2}$ "
3440	$\frac{13}{16}$ " - $\frac{7}{8}$ "	9"	1 $\frac{15}{16}$ "	— x $\frac{9}{16}$ "

Tappet Wrench Set No. 3400-E

Illustrated at the right is the most popular set of Tappet Wrenches ever gathered together, because they were selected to give you 8 of the most popular opening sizes.

The set consists of Tappet Wrenches Nos. 3425, 3426, 3430, 3435, in a handy, useful, little leatherette kit No. 2405. The weight is 1 $\frac{1}{4}$ lbs.

The opening sizes of the wrenches in this set can quickly be determined by referring to the table above.

Streamlined Tools

No. 4520

No. 4532

ADJUSTABLE WRENCHES

Thin, light and strong, 22½° angle openings. Deep-throated openings equally efficient on square or hexagon nuts and bolts.

PLOMB STUD PULLERS

← New Detachable Wedge Type

Latest development in stud pullers. No. 4520 for ¼" to ¾" studs; No. 4532 for studs from ¾" to 1" turns in a smaller circle and will work much closer to obstructions. The No. 4520, for example, turns in a 2" circle.

Set-screw in side of stud puller prevents loss by keeping wedges in body when not in use.

No. 4520 is 1 ⅝" in diameter, 4" long and has ½" square service connection.

No. 4532 is 2 ⅛" in diameter, 5 ½" long, and has ¾" square service connection.

Both sizes will take the longest studs.

Standard ½" Square Drive

No.	Description	Wt. lbs.
4520	Stud Puller Complete with 4521 and 4522 Wedges; Capacity, ¼" to ¾" Studs.....	1 ¼
4521	Thick Wedge, Capacity ¼" to ¾".....	
4522	Thin Wedge, Capacity ¼" to ¾".....	

Heavy Duty ¾" Square Drive

4532	Heavy Duty Stud Puller, with 4533 and 4534 Wedges; Capacity ¾" to 1" Studs.....	4 ¼
4533	Thick Wedge, Capacity ¾" to 1".....	
4534	Thin Wedge, Capacity ¾" to 1".....	

Eccentric Type Stud Pullers ½" Square Drive

One of the best of this type. Knurled nut jams on stud when turned. ½" square drive in end, or open-end wrench can be used on body.

No.	Fits Studs	Use Wrench	With Roller	Wt. lbs.
4508	¾" to 1"	1"	No. 4511	¾

The kind of tools you use typifies the kind of work you do. Better tools build greater customer confidence.

Cat. No.	Length	Jaws Open Up to
704	4"	5 ⅝"
706	6"	5 ¾"
708	8"	5 ⅞"
710	10"	1 ⅞"
712	12"	1 ⅞"

Special Tools for Other Cars

No. 6601
Starter Wrench for Plymouth, Dodge, Chrysler, De Soto.
 Shaped to clear obstructions when removing or replacing starter. $\frac{5}{8}$ " 12 point opening.

SPECIAL FORD TOOLS

No.	DESCRIPTION
6516	V8 WRIST PIN TOOL Fast and accurate. Pin is put on tool, pilot and pin inserted in heated piston, and knurled nut drawn up snug by turning with fingers. Pin is then driven into position with hammer or by striking tool on block. To remove pin, heat piston, reverse operation and drive on pilot end. $6\frac{7}{8}$ " long.
6523	V8 CON. ROD NUT SOCKET This $\frac{9}{16}$ " hexagon thin-nose socket is absolutely essential when working on V8 con. rods. $\frac{1}{2}$ " square drive. Non-Replaceable.
6528	CARBURETOR JET WRENCH For many V8's, '34 and later. Turns easily with cross pin and knurled shank.

No.	DESCRIPTION
6539	V8-85 VALVE LIFTER Powerful, simple, with long leverage to break loose the toughest guides. Push guide down to remove keeper, then pry, with opposite block as fulcrum, to force guide out. 30" long, $\frac{3}{4}$ " stock. Non-replaceable.
6541	V8-60 VALVE LIFTER Same type as No. 6539 except 24 inches long. $\frac{11}{16}$ " stock, and with smaller opening for the 60 guides. Non-replaceable.
6545	FORD DRAG LINK AND SHOCK ARM TOOL Tapered fork of slim design is readily inserted to separate the shock links and tie rods. A real time saver. Knurled handle; overall length, 16".

Special Tools Save Time

THE PLOMB LINE IS THE ENGINEERED LINE FOR GREATEST EFFICIENCY

PLOMB *Streamlined Tools*

SPECIAL CHEVROLET TOOLS • •

6734	VALVE ADJUSTER	Use No. 6734 for speed, ease and accuracy when adjusting overhead valves. Uses any standard socket. Loosen lock nut first, then operate driver for adjustment setting valve clearance Plomb Feeler Gauges. Screw driver blade with knob, No. 6734S can be purchased separately. This tool is also used with clutch adjusting machines.
1730	STARTER & MANIFOLD WRENCH	This box wrench, obstruction type, is crescent-shaped to easily reach and turn Chevrolet starter and manifold nuts, as well as other nuts of these sizes in hard-to-turn places, $\frac{3}{16}$ " and $\frac{5}{8}$ " 12-point openings.
5245	OIL PAN SCREW DRIVER	Makes a quick, easy job of Chevrolet oil pan work. Pilot fits over head of screw, holding screwdriver in position for fast spinning with Cub $\frac{3}{8}$ " square drive handles. Bit $\frac{1}{2}$ " wide, $\frac{1}{16}$ " thick; nose of pilot $\frac{5}{8}$ " diameter; overall length, $17\frac{3}{8}$ ".
5438	'32 AXLE NUT SOCKET $\frac{1}{2}$ " Square Drive	$1\frac{1}{16}$ " 12-point opening is a special size required for 1932 axle nut.
5538	$\frac{3}{4}$ " Square Drive	This is the heavy-duty size of $1\frac{1}{16}$ " 12-point socket, which is essential for turning the 1932 Chev. axle nut.
6702	ADAPTOR FOR CYLINDER HEAD NUTS	Clears obstructions on Chevrolet cylinder heads. $\frac{3}{4}$ " 12 point box opening on one end, $\frac{1}{2}$ " square drive on the other. For use with Hinge Handle, Pin Handle or Torque Wrench. A real time saver that will make your work easier. Weight $\frac{3}{4}$ lb. each.
6731	STARTER AND MOTOR SUPPORT WRENCH Openings $\frac{3}{4}$ " x $\frac{5}{8}$ "	A correctly designed wrench for these two important purposes. $\frac{5}{8}$ " end takes starters up to and including 1936, also right front motor mount bolt on all late models. This is a badly obstructed spot directly under timing gear case, the 6731 makes it unnecessary to remove radiator assembly to service motor supports. The $\frac{3}{4}$ " end is correctly bent and offset to work on starters from 1937 on. Note: See No. 30— $\frac{3}{16}$ x15 for opening star lock on motor mount bolts.

PLUMB

Aviation Tools

Here are a few representative Plumb tools for aviation use. Each of the sets shown on this page has been selected because of popularity among aircraft mechanics. Made in the heart of the aviation industry, Plumb Tools help build ships that fly better. For other tools for aviation use, refer to respective sections of this catalog.

Plomb Hack Saws

No. 351

A

B

C

No. 344

No. 360

No. 351

An extremely well built frame with many new features especially adaptable to the hard service required from the plumber and electrician. The patented swivel locks blade at any desired angle. Plastic non-breakable handle is inverted and moulded to fit hand to give maximum power downward along the line of the blade. Rigid construction and blade-locking device eliminates "whip" reducing breakage. Blade slides up or down legs for use in close places with a minimum clearance of 2".

Made of 3/16x3/4 steel, full plated and adjustable to 8-10 and 12 in. blades, this Plomb tool has many more uses than the older style frames. Wt., 1 lb. 12 oz.

No. 351-L

A 9" extension which replaces the adjustable leg of the No. 351. Fits all standard blade sizes. For use in restricted places with full cutting power of a rigidly held blade. Allows maximum blade clearance at any depth it may be used. Wt. 3 oz. This leg portion is illustration (c) at the left. The leg is a separate attachment for the No. 351 Frame.

No. 344

Here is just the compact hack saw frame for you, Mr. Electrician. Mr. Plumber and Mr. Mechanic, where a high frame won't work. Takes 10" blades. Wt. 1 lb.

No. 360

For those of you who want a good strong sturdy hacksaw frame at a low price, choose this one with pistol grip handle.

209

215

218

256

226

NO. 206—8" DIAGONAL CUTTING PLIER

Handhoned cutting edges, perfectly matched. Designed with thin, narrow jaws that will work easily in congested places. Plomb "Name-Nurl" handles assure firm grip.

NO. 207—7" DIAGONAL CUTTING PLIER

A well-balanced, ruggedly constructed cutter for heavy service. Cutting edges hand-honed to perfect match. Form-fitting "Name - Nurl" handles provide slip-proof grip.

NO. 209 HEAVY DUTY DIAGONAL PLIER

A real giant for easy cutting. You will like the short powerful jaws and ample cutting leverage. A real plier for heavy work. 9" long.

NO. 215—BRAKE SPRING PLIER

Curved jaw clears edge of brake shoe to bring it in close adjustment with center line of spring. Hook jaw is thin to easily enter under spring. Parts for 215, bolt and nut No. 215B, curved jaw No. 215C, hook jaw No. 215H.

NO. 218—ANGLENOSE BATTERY PLIER

Thin jaws at correct working angle for battery terminal nuts. Plomb "Name-Nurl" handles for positive grip.

NO. 256—6" SLIP JOINT PLIER

A well made pocket plier of conventional design bearing the Plomb name of quality but at a price so low it has no equal or rival on the market.

NO. 226—6" NEEDLE NOSE SIDE CUTTING PLIER

The needle nose with side cutter makes an ideal combination for electrical work. The cutting edges are hand-honed, the grips are the famous Plomb "Name-Nurl."

NO. 227—7½" DUCK BILL PLIER

A very useful plier built for long powerful leverage with Plomb "Name-Nurl" handle grips. A general plier for radio, carburetor, electrical type-writer and adding machine work.

No. 227

NO. 228—7½" CHAIN NOSE PLIER

A variation of the No. 227 type, length and handles the same, but with narrow nose.

No. 228

NO. 235—SLIP JOINT IGNITION PLIER

Light and convenient to use. Three position slip joint allows parallel openings up to 3/8". Length 4½". Bolt and nut only, No. 235B.

No. 235

NO. 236—6"; No. 238—8" WRENCH PLIERS

General utility pliers of popular usage. Jaws open up 7/8 and 1 1/8 inches, on the 6 and 8 inch respectively. 236B extra bolt and nut, 238B extra bolt and nut.

No. 236 and No. 238

NO. 240—WATER PUMP PLIER

8 position joint allows parallel openings up to 1 5/8 inches. Handles are form-fitting with Plomb "Name-Nurl" grips. Length 9½ inches. No. 240B, bolt and nut only for No. 240 pliers.

No. 240

NO. 245—5" SLIP JOINT SIDE CUTTING PLIER

The slender, tapering jaws with two position adjustment make these pliers convenient and efficient. Plomb "Name-Nurl" grips.

No. 245

NO. 247—7" SLIP JOINT SIDE CUTTING PLIER

Has slender jaws with two position adjustment. Jaws are deeply cross-broached for positive gripping. Handles with well-known Plomb "Name-Nurl" grip.

No. 247

- No. 1370D—Cross Pein Tips only

No. 1430

No. 1387

No. 1448

No. 1430—Brass Hammer

A brass hammer that is used for many purposes, such as in body and fender work, fitting wrist pins, etc. Made of an alloy brass that is just the right hardness. Approximate overall length, 11½"; weight, 1¾ lbs. Handle for above No. 1316H.

No. 1387--3 lb. Calking Hammers

A hammer primarily produced for the journeyman plumber, but ideal for many industrial purposes.

2-Way--No. 1448

A Plomb two-way hammer for you. Steel head with rubber head opposed. Just the hammer for mounting tires—drawing rivets. Also used by plumbers, machinists and woodworkers. Weight 2¼ lbs.

No. 1448B Extra rubber heads

No. 1386--3lb.

Blacksmith's Hammer

Forged from selected steel. Handle finest hickory, perfectly balanced. Handle for above No. 1416H.

Rubber Mallet--No. 1368

A rubber hammer made of live resilient rubber but with head sufficiently solid that its use is practical where damage would be caused with a metal hammer. Does not mar the surface of material. Weight 24 oz. Overall length 15".

Ball Pein Hammers

Paschall Brand ball pein hammers, made by Plomb are forged from a special analysis carbon steel. Heat treated on face and ball peins only so the full-polished surfaces will not dent or chip while eye retains maximum toughness.

96-3/4	3/4"	10"	1/2"

Set No. 96A

Set No. 96A pictured at right consists of the first six sizes listed in handy leatherette kit No. 2404.

Special Cold Chisels

Forged from selected steels best adaptable for chisels. You will find their cutting edges are correctly beveled. To obtain best results, Plomb Chisels should be used at a 45° angle and the cutting edge held tight up against the work. Cut with the entire blade,—don't use the corners.

Set No. 86AA

Cat. No.	Stock	Cut	Length
86A 3/16	3/16"	7/32"	4 1/4"

Packed 6 Strips of a Size in Envelope.

No. 000D—Ignition Gauge Set

This set consists of 10 blades, 3/16" wide by 1 1/2" long, in Holder. Thicknesses as follows: .011", .012", .014", .018", .020", .022", .025", .028", .032", and .035". Complete in Holder.

(Blades not sold separately)

PULLERS

▽ **PLUMB** ▽ *Streamlined Tools*

Puller No. 4056 in operation using two jaws, outside pulling.

Puller in reverse pulling position using three jaws.

No. 4056 BK

How jaws clamp into position for inside pulling, using the three jaw set-up for additional strength.

No. 4056

Puller No. 4056 is adapted to a multitude of inside and outside pulling jobs. Left illustrates puller with rubber slide hammer, right with steel hammer.

PLOMB SLIDE HAMMER PULLER SPECIFICATIONS

No. 4056-K—Plomb cushion-grip hammer is oversize for tough pulling jobs, it has a thick, shock absorbing rubber covering and vulcanized to the steel core. Weight, 4 1/4 pounds.

Jaws

- 4056J—3 1/2" Reversible Jaw.
Pulling Range 0" to 3" Outside,
1 1/4" to 3/4" Inside.
- 4056L—4 1/2" inside jaw. Range, 3 1/4"
to 6"
- 4066 —4 1/2" outside jaw. Range, 3"
to 4".

4056C--Cap Screw Cross Arm

Exceptionally fast for pulling timing gears having cap screw holes in hub. For any member not accessible to ordinary puller jaws, drill and tap two holes, attach 4056C and pull. Slotted to take 3/8" cap screws.

Yokes

PULLING COMBINATIONS POSSIBLE WITH SETS LISTED BELOW

- 4056 —I and II.
4056A—IV.
4056B—I, II, and IV.
4056D—I, II, III, IV, and V.

2-jaw combinations possible with addition of 4061 2-way yoke.

Pullers That P-U-L-L

No. 4060--2-way

No. 4070--3-way

For all around utility on
gears, pulleys, bearings, etc.

Many jobs can be handled by various types of tools, but when it comes to a pulling job there is only one tool that can lick it—and that's a puller that really pulls.

Used properly, pullers save both time and money . . . not to say your disposition. On this page are shown the simple steps in using pullers of the 4060 and 4070 types. Your assortment of tools should include efficient pullers to handle ordinary needs. Shown in the left hand column are the 4 steps in the use of pullers of this type, on an outside pulling job. First hold the jaws in place and screw the threaded shaft down snugly. Next, tighten collar against jaws. Then, hit striking end of shaft sharply with hammer to break assembly loose. Finally, turn down shaft with open end wrench.

Below: 3-jaw puller in action.

No. 4070
3-Way Puller
Wt. 2½ lbs.

Showing the two-way cross arm No. 4061.

Small Pullers

**Fast and Easy to Use on the
Little Pulling Jobs**

The size and range of both 4060 and 4070 are the same.

Short jaws have range from 0" to 3"; long jaws from 3" to 4". With No. 4056N, nut used on Slide Hammer Puller, short jaws can be reversed and used for inside pulling.

These two small pullers are designed to pull the little gears, pulleys, bearings quickly and easily. The narrow jaws get into very close places. Adjusting nut holds jaws firmly in position so they can't slip off. Any convenient wrench can be used on the 5/8" square head of screw.

THE PLOMB LINE IS THE GUARANTEED LINE OF QUALITY TOOLS

Plomb Universal Wheel Puller

Handles Practically All
Types of Wheels with
3, 4, 5, 6 and 7
Studs

This is the simplest and fastest wheel puller made. It pulls wheels of practically every car. Legs shown are quickly adjustable to any drum with 3, 4, 5, 6 or 7 studs, in a circle up to 6½" diameter. With No. 4001JT Legs, it is adaptable to any drum with studs in a circle up to 8". Regular legs are drilled to take up to 9/16" studs; 4001JT legs will take up to ¾" studs.

4001T—Metal Box for Wheel Puller

Box, illustrated below is made of heavy-gauge sheet steel and the No. 4001 Wheel Puller fits into it as shown, 1½" deep, 8¼" wide, 8½" long. Three compartments.

No. 4001

Pulling the hub of
a Ford V8 car,
using Adapter.

Universal Puller
on a
wire-wheel car.

The Plomb Universal Wheel Puller makes other types of wheel pullers obsolete. For all cars, including Ford with adaptor shown above at right, and light trucks. With No. 4001JT jaws, listed below, pulls wheels of light trucks, such as Chevrolet and International.

THE PLOMB LINE IS THE POPULAR LINE AMONG EXPERIENCED MECHANICS

No.	DESCRIPTION
1368	RUBBER MALLET Every repair man finds this hammer a necessity especially where a metal hammer would mar the surface. Wt. 24 oz. Length 15".
	SOFT TIPPED HAMMERS Removable tips of molded plastic. Will stand lots of pounding and still not damage the surface of the material. A Plomb innovation is one end with round face, the other cross pein.
1370	6-oz. PLASTIC TIPPED HAMMER With Cross Pein Tip.
1375	16-oz. PLASTIC TIPPED HAMMER With Cross Pein Tip.
1383	8-oz. PLASTIC TIP HAMMER With Round Tips.
1385	16-oz. PLASTIC TIP HAMMER With Round Tips. Extra Tips for above.
1370C	RO. FACE TIPS
1370D	CROSS PEIN TIPS
1386	BLAOKSMITH HAMMER Long head for body fender and frame work. 3 lb.
1416	LONG HEAD BUMPING HAMMER Provides extreme clearance for late model fenders. Weight decreased and perfect balance achieved by means of semi-I-beam. Neck head 9", clearance 6 3/4", wt. 2 3/4 lbs.
1419	MAGNETIC TRIM HAMMER A favorite because of its long reach and head radii. The head is curved in about the arc of a natural swing. Length of head 5 1/2". Wt. 7 oz.
1421	DINGING HAMMER Has large face for roughing the bad ones into shape for finishing. Head 6" long, 1 1/4" and 1 5/8" round. Faces slightly crowned. Wt. 1 1/4 lb.
1422	LIGHTWEIGHT FINISHING HAMMER Ideal on dural or for straightening any light metal. 1" round face and 13/16" medium crowned Wt. 5 oz.

No.	DESCRIPTION
1424	FINISHING HAMMER Light of weight in perfect balance. Ro. face 1 1/4" dia. slightly crowned 1-1/16" sq. face. Wt. 1/2 lb.
1425	FINISHING HAMMER Heavier than 1424. Weight about 3/4 lb. Ro. face slightly crowned. 1 1/2" dia. with 1 1/8" sq. face.
1426	LONG BODY FINISHING HAMMER For crowned fenders and other places where clearance is needed. 1 3/8" Ro. face slightly crowned. 3 1/2" clearance. Ro. cross pein 1 1/8" wide on other end. Has 4" clearance. Wt. 3/4 lb.
1427	FINISHING HAMMER Has wedge shaped cross pein 1" wide, 2 1/2" clearance. Used for fender heads corner along panel beading, etc. Ro. face 1 3/8" dia. slightly crowned 2" clearance. Wt. 1/2 lb.
1428	PECKING HAMMER Pointed end for picking out small dents. Ro. face for finishing. Head 5 3/8" long overall. 1 1/2" dia slightly crowned Ro. face. Wt. 12 oz.
1429	TURRET TOP PECKING HAMMER Eliminates uncomfortable reaching. Handle 18" long, reaches to center of turret top. Head 9" overall. Wt. 1 lb. This hammer combines a long curved pecking point with long necked ball-pein.
1430	BRASS HAMMER One of the most satisfactory soft hammers ever used. Wt. 1 3/4 lbs.
1432	STRAIGHT AND CROSS PEIN HAMMER No. 1432—for all concave surfaces. Head 6 1/2" overall. Wt. 10 oz. The pein at right angles gives you a convenient hammer regardless of your working position.

1472

THE PLUMB LINE IS THE ACCEPTED LINE IN ALL INDUSTRIES

1462 EGG-SHAPED DOLLY.

A very popular shape, with many different curves and radii. 1 5/8" thick. 2 1/2" wide, 3 3/4" lg. Wt. 2 3/4 lbs.

1463 RAILROAD OR GENERAL PURPOSE DOLLY.

A large variety of radii are provided in this dolly, with perfect hand fit. Heavy weight for bumping out dents, thin beading edge and 7 1/2 square inches of working area on the large face are responsible for its popularity. Weight 3 pounds.

1454 RADIUS DOLLY.

A useful design that has many radii. Bottom and one side flat, forming a right angle. 1 3/32" thick, 2 3/16" wide, 4 1/2" lg. Wt. 2 lbs. 10 oz.

1455 NEW BEAD DOLLY.

Use for beads or rolled fenders. Start with wedge end and finish with curved top. The flat side can be worked under long curve of fender. Thin edge useful for corners and beading. Comfortable hand grip. 4 3/8" long, 2 3/4" wide, 1 3/4" thick at top. Wt. 2 1/2 lbs.

1456 FENDER WELL DOLLY.

One end long curve, other short curve. Long to give firm grip. 1 1/4" thick. 2" wide, 5" long. Weight, 2 lbs.

1457 SHRINKING DOLLY.

The unique shape, low crowned surface of this dolly gives it an all-purpose use where shrinking of body metal is concerned. Excellent also for raising beads and moulding. Wt. 2 1/4 lbs.

1458 HEEL DOLLY, SEMI-ELLIPTICAL.

This dolly provides two flat and two crowned working surfaces. Especially useful in restricted places and can be used for shrinking metal. Wt. 2 lbs.

1472 RIGHT ANGLE SPOON.

Can be used in many places where dollies will not work. Especially designed for turret tops and roof panels. Wt. 3 lbs.

1474 LONG, BROAD SPOON.

Slightly-crowned face 2 1/8" wide, 5 1/2" long. Shank 3/4", diameter, 5" long. Weight 1 1/4 lbs.

1475 SHORT, HEAVY SPOON.

Gives powerful leverage under fender and body brackets, behind corner braces, in door hinge recesses, etc. Tapering face 1 3/8" at widest point, slightly crowned, 5" long. 1 1/4" diameter shank 4 3/4" long. Weight 1 3/4 lbs.

1476 SHORT, BROAD SPOON.

Sharply curved at end; especially adapted to reaching over and behind top rails when straightening out quarter panels, and for other uses where sharp radius and broad face are needed. Face 2" wide, and 4 3/4" long around curve. Shank 3/4" diam., 4" long. Weight 1 lb.

1524 GLASS REMOVING CHISEL.

A practical tool for removing broken glass from window and door channels.

1525 RIPPING CHISEL.

Many straightening jobs make it necessary to rip or cut body metal not subject to repair. Designed with removable double edged cutting blade. The life of this chisel is indefinite, and new blades can be purchased at nominal cost.

14	$\frac{1}{2}$ "	1 $\frac{9}{32}$ "	11 $\frac{1}{2}$ "	$\frac{3}{4}$ lb.
14	$\frac{3}{8}$ "	1 $\frac{1}{16}$ "	9"	$\frac{3}{4}$ lb.
14	$\frac{3}{8}$ "	1 $\frac{1}{16}$ "	12"	$\frac{3}{4}$ lb.
14	$\frac{3}{8}$ "	1 $\frac{1}{16}$ "	18"	$\frac{3}{4}$ lb.
14	$\frac{3}{4}$ "	$\frac{7}{8}$ "	14"	$\frac{3}{4}$ lb.

No. 135—Bending Irons

135 $\frac{1}{2}$ "	$\frac{1}{2}$ "		10 $\frac{3}{4}$ "	$\frac{1}{2}$ lb.
135 $\frac{3}{8}$ "	$\frac{3}{8}$ "		10 $\frac{3}{4}$ "	$\frac{3}{4}$ lb.

THE PLOMB LINE IS THE GUARANTEED LINE OF QUALITY TOOLS

No. 20—Elbow Calkers

The 45° angle gets into places inaccessible to Nos. 11 and 33 calkers, described below. Ground straight

No.	Stock	Blade	Length	Wt.
20-1/2	1/2"	1 1/8" Wide	4 1/4"	5 oz.

No. 21—Pony Calkers (Pair)

No.	Stock	Blade	Length	Wt.
21-1/2	1/2"	3/4" Wide	3"	Curved

Gasket Calkers

No.	Stock	Blade	Length	Wt.
31-1/2	1/2"	Short	5 1/2"	10 oz.
31-3/4	3/4"	Short	7"	10 oz.
131-1/2	1/2"	Long	9 1/2"	12 oz.
131-3/4	3/4"	Long	10"	12 oz.

No. 033—Offset Calkers (Pair)

No.	Stock	Blade	Length	Wt.
033-1/2	1/2"	3/4" Wide	5 3/4"	13 oz.
033-3/4	3/4"	1" Wide	6 3/4"	13 oz.
033-1	1"	1 1/4" Wide	7"	14 oz.

No. 33—Long Calkers (Pair)

Used for calking lead in hub of soil pipe. Ground both inside or outside; concave blades fit 4" pipe.

No.	Stock	Blade	Length	Wt.
33-1/2	1/2"	3/4" Wide	5 1/2"	12 oz.
33-3/4	3/4"	1" Wide	5 3/4"	12 oz.
33-1	1"	1 1/4" Wide	6 3/4"	13 oz.

Water Main Calkers

Do a good, fast job of calking joints in heavy cast iron water mains. Ground square; handle offset for knuckle clearance.

No.	Stock	Blade	Length	Wt.
108-1/2	1/2"	3/4" x 1"	8"	1 lb.
108-3/4	3/4"	1" x 1"	8"	1 lb.
108-1	1"	1 1/4" x 1"	8"	1 lb.
109-1/2	1/2"	3/4" x 1"	8"	1 lb.

No. 130—Ceiling Calkers

No.	Stock	Blade	Length	Wt.
130	5/8"	1 1/2" Wide	10"	1 lb.

No. 132—Right and Left Calkers

Calk joints near walls or in corners where Nos. 31 or 33 calkers cannot be used. Made both right and left, ground either inside or outside. Come in pairs.

No.	Stock	Blade	Length	Wt.
132R	5/8"	1 1/2" Wide	8 7/8"	1 1/2 lb.
132L	5/8"	1 1/2" Wide	8 7/8"	1 1/2 lb.

Broad Curved Nose Calking Iron

No.	Stock	Width	Thickness	Length
110-1/2	1/2"	1 1/2"	1/4"	8 1/2"

Tubing Expanders

No.	Length	Steps	Expands Pipe to	Wt.
136	3 1/2"	3	1 1/4", 1 1/2", 1 3/4"	14 oz.

THE PLUMB GUARANTEE

Plumb Tools are forged from the finest steels, scientifically heat-treated. They are guaranteed to perform the work for which they are designed and intended to be used, and to last as long as is consistent with ordinary wear and tear. Any Plumb Tool that may be found defective in workmanship or material, and is returned to the factory, charges prepaid, will, at our option, be replaced, or repaired, or credited at current prices.

There are a few items listed in the catalog marked "no replacement". They are few and represent tools made extremely light, which will give good lasting service in skilled hands.
